GCHQ'S MENU OF TOOLS SPREADS DISINFORMATION ACROSS INTERNET

edit] Effects Capability

JTRIG develop the majority of effects capability in GCHQ. A lot of this capability is developed on demand for specific operations and then further developed to provide weaponised capability.

Don't treat this like a catalogue. If you don't see it here, it doesn't mean we can't build it. If you involve the JTRIG operational teams at the start of your operation, you have more of a chance that we will build something for you.

For each of our tools we have indicated the state of the tool. We only advertise tools here that are either ready to fire or very close to being ready (operational requirements would re-prioritise our development). Once again, involve the JTRIG operational teams early.

Tool	Description	Status	Contacts
ANGRY PIRATE	is a tool that will permanently disable a target's account on their computer.	Ready to fire (but see target restrictions).	[Tech Lead: Expert
ARSON SAM	is a tool to test the effect of certain types of PDU SMS messages on phones / network. It also includes PDU SMS Dumb Fuzz testing &.	Ready to fire (Not t against live	[Tech Lead:
		targets, this is a R&D Tool).	Expert User:]

¿Dudas?

People don't like to think they're manipulated, But every day we're being manipulated—by advertisements, by government leaders, religious leaders, and even into going to work.
